

# Cursive, Creative writing & Storytelling

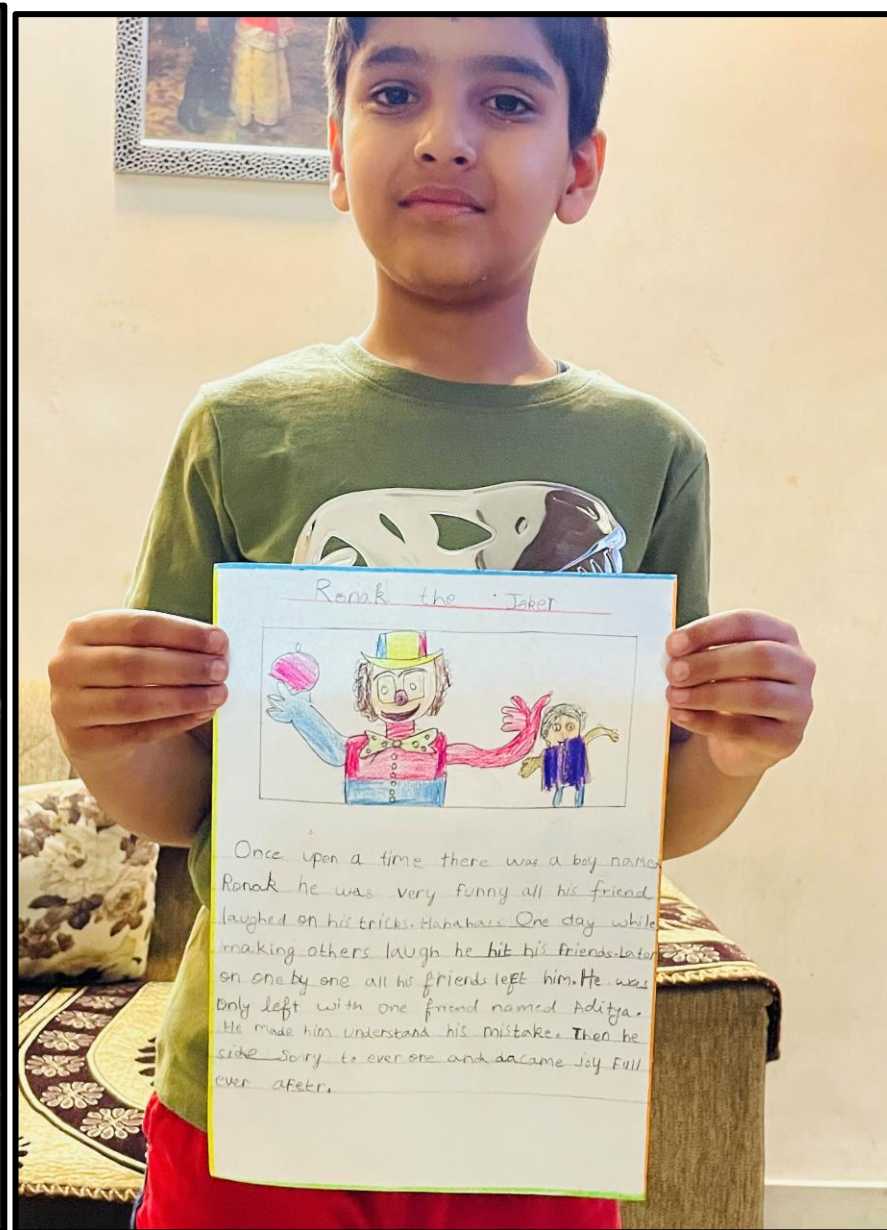

Proficiency in any language is an amalgamation of how you present the language i.e. your handwriting and how creatively you are able to present your ideas both in written and oral form. The aim of this summer programme was to help students appreciate the beauty of each and every stroke of cursive and eventually experiencing the pleasure of writing in cursive and to help students discover their passion for creative writing and storytelling.

Both the skills help kids in developing emotionally and intellectually. By creating a story the child discovers how to channel their emotions and how to manage in different situations. Creative writing develops creative thoughts, using imagination, suggesting alternatives, It broadens their thought process and problem-solving abilities.

The Summer Vacation Programme included

- Cursive writing Workshop
- Story Writing
- Comic Strip Writing
- Puppet making
- Storytelling
